**Who** is this Press Release intended for? Carlos wants to attract any accredited investor in any shape or form. CarlosX360 Co., Ltd. was designed with the future in mind. Carlos' biggest passion is Video Games, but Video Games has become an expensive investment, with an exponential potential for profit. Video Games is a part of technology, and new devices are coming fast to reinvigorate the industry in ways that hasn't been done since 1982 when NES was revolutionizing the industry. More, more, and more tech companies are entering the VR space with their own devices. Video Games are here to stay, but the risk is too great, even though there are tremendous rewards to be had. Carlos has to prove to investors there is a market, and prove to investors Carlos can build & grow a business or businesses. Carlos wants to enter the tech sector, as it goes hand-in-hand with Video Games. Carlos isn't just looking for capital. Carlos is looking for advice, resources, ideas, and guidance.

**50 second pitch to investors:** Video Games is a 130 Billion dollar industry. Call of Duty is in the lead currently with 250 Million copies or customers reached, and each quarter they accumulate \$1 Billion. CarlosX360 is a global network of blogs and forums in the video game industry with 1 Million Users worldwide, and 3 Million pageviews worldwide.

**How** will you return my funds? Hey, Carlos planned ahead of this. That's why the name isn't constrained to a particular niche. Carlos intends to go not just outside of gaming, but also have multiple revenue streams to help offset costs to do one thing or the other.

In the past, CarlosX360 Co., Ltd. built niche blogs and forums. Today, that's still the case, and it will be part of how Carlos sells games to consumers. In the past, Carlos was doing niche game sites. Starting in 2019, Carlos has no plans to do niche game sites anymore. Apart from large-scale niche subjects, such as CODFourms, which is a Call of Duty Forum that has been running since 2009 under Carlos' guidance. How Carlos makes money from these sites are by traditional banner ads, but also CAPTCHA Ads that display as you register.

To become profitable is simple. Scaling the websites that are currently live. As of right now, there is a market for websites, blogs or forums that don't "clickbait." (Ahem, more like hatebait.) Many people are looking for alternative ways to get news.

On the consumer side of the company, Carlos plans to create Video Games, but it costs \$50 Million to develop the game itself. This isn't burnt through a single year, it's burnt through 5 years of operation.

We are in the midst of a transitional generation leap into the Next Generation consoles. Microsoft threw down the gauntlet at E3 2019 by announcing that their Next Generation console, Project Scarlett will release Holiday 2020. Carlos has already begun to get ready for the new consoles by buying a Nintendo

Switch Forum, a PlayStation Forum, and Carlos intends to trail the Project Scarlett unveiling. Project Scarlett is merely a codename for the next game console.

**When** will we get our funds back? When the company is either profitable or has gone IPO, and still is profitable.

**Where** is CarlosX360 Co., Ltd. currently headquartered? In Silicon Valley. In a small city called San Carlos.

Carlos' long term goals are ambitious, but to realize those goals for CarlosX360 Co., Ltd. and any CarlosX360 project, it requires more than a team, capital, or resources.
